ABUS Touch™ 57/50 & 57/45

The ABUS Touch™ 57/50 fingerprint padlock now has a smaller brother, the ABUS Touch™ 54/45. Enjoy the same convenience of the ABUS Touch™ with a smaller shackle dia (6.5mm). Just the thing for locking personal items that have a smaller locking diameter - Personal lockers, toolboxes, cabinets or letterboxes.

- CR2 battery included
- Encrypted memory
- Double ball locking for higher security
- Coated Nano Protect™ shackle * Coated body
- Automatic opening by spring-loaded shackle
- Suitable for indoor or outdoor use (IP66 & IP68)
- Two admins and up to 20 users can be registered
- Efficient energy usage gives up to 10,000 openings

TOYOTA ALL KEYS LOST SOLUTIONS

**ADVANCED
DIAGNOSTICS**

SMART Pro Toyota 'H' Bladed All Keys Lost Cable ADC2016

- Solution for Toyota 'H' bladed when all keys lost.
- Utilised to extract transponder key data from the vehicle.
- Connects to specific fuse locations and the key unlock warning switch in the vehicle.
- Does not require the removal of the immobiliser ECU from the vehicle.
- Works in conjunction with and requires the emulator ADC2015.
- Support materials and end user guide available via SMART Pro device, CarLab & MYKEYSPRO

SD755976AD

SMART Pro Texas DST Emulator for Toyota

- Used for when all proximity keys are lost.
- Connects to the SMART Pro by way of USB.
- Key data read from the vehicle by the Smart Pro is stored in the emulator.
- The emulator becomes a master key.
- Using the emulator the operator can program new proximity fobs to the vehicle.
- Also used in conjunction with ADC2016 for Toyota 'H' bladed key systems.

SD755650AD

**At the time of release the ADC2015 emulator covers select DST128 proximity fobs only, with further coverage to follow.

TIME SAVING SOLUTION FOR PROGRAMMING SLOT AND PROXIMITY KEYS TO VOLVO VEHICLES

**ADVANCED
DIAGNOSTICS**

NEW

The dongle connects to the vehicle OBD port and extracts the required security data freeing up SMART Pro for other jobs. The dongle stores the reading session meaning if interrupted it will commence from the previous finish point.

This means that the data could be read over a number of different sessions. The LEDs on the dongle will give a visual indication when the required data has been read. Thereafter keys can be programmed by connecting the dongle to the SMART Pro and following the programming process in the SMART Pro.

HEAVY-DUTY BORG BL7701

The heavy-duty Borg BL7701ECP is available in MGPRO finish or satin stainless. The BL7701 features ECP with built-in key override in the lever. The cylinder is a SFIC (small format interchangeable core) cylinder.

The rotation of the key engages the lever handle. The keypad lever clutches and only engages when the correct code of key is entered.

An ideal retrofit upgrade for our own standard BL5000 and competitors Unican 1000 or 5000 models, where frequent code changing is required.

Features:

- Fully mechanical digital lock with key override
- With a SFIC cylinder on Silca profile BES1
- New Easi-code on-door code changing procedure
- 8 mm square drive suitable for mortice locks
- 60 mm heavy duty stainless steel tubular latch
- Fully reversible
- Suits doors from 35-80 mm thick
- Up to 1024 codes to choose from
- Available in MGPRO or satin stainless finish

SMART KEYGARAGE™

THE SMARTEST KEY HANDOVER

NEW

Store and hand over keys securely without having to be on site.

No more hiding the key under the doormat or in the flower pot: With the KeyGarage™, ABUS offers an intelligent and secure solution for storing keys. Secured by means of a number code, the strong steel plate housing protects keys and code cards against unauthorised access.

If keys need to be made accessible to several people, the KeyGarage™ offers a simple and secure solution for easy exchange. All that is required is notification of a number code to those with authorisation. If the group changes, the code can be changed quickly and easily – 10,000 different codes are available for this purpose. The KeyGarage™ is therefore ideal for vehicle rental companies, for example, owners of holiday homes or for use in the field of mobile healthcare.

The solid metal housing and strong locking cover made from pressure-cast zinc secure against unauthorised access as required. A plastic cover also protects the number mechanism against the effects of the weather.

LEADING ELECTRONIC SECURITY BRANDS

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001.

For nearly 20 years SALTO has been synonymous with innovative solutions, including stand-alone, cloud-based and mobile applications, that set new standards in security, manageability, flexibility and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

SALTO
inspired access

Over the past four decades, RISCO has become a technological leader in the global security solutions market, with millions of satisfied customers worldwide and regional offices around the globe.

Developing cloud-based security, video monitoring and verification, and connected home solutions, RISCO delivers innovative, top quality and reliable security products for every type of security and safety installation for the residential and commercial markets.

RISCO

Neptune Security Products was formed to meet the growing demand for high quality, affordable and easy to install security options for almost any location & application.

Dedicated to providing the latest in security innovations, Neptune is constantly sourcing from a large group of cutting-edge manufacturers around the world, ensuring it offers the most up to date technology, excellent levels of product performance, user convenience, and modern styling.

NEWS AND EVENTS

7:00am 14th November

Avondale Golf Course Club Rooms

7:00am 17th November

LSC NZ Poland Rd, Glenfield

RSVP 1st November

You're invited to Breakfast!

Yes, LSC is holding another one of our popular breakfast events. This year we will hold one in Christchurch on 14th November at the Avondale Golf Course club rooms. The second will be in Auckland on the 17th November at our office in Poland Rd, Glenfield. Both events will start serving at 7.00am

To make things very easy, we are holding the breakfast the morning after the MLAA meetings that are being held in Christchurch and Auckland. This will allow those people who travel to the MLAA event to stay overnight and then join us for breakfast.

The breakfast is open for all our customers and staff members and as always, everybody is welcome. The only thing that we ask is that you please **RSVP by the 1st Nov** just to ensure we have enough food for everyone.

We would also like to take this opportunity to present some of our new product ranges and help with any technical questions that you may have.

You should already have an invitation but if not please treat this as your official invite. Looking forward to seeing you all.

MLAA VISITORS

ABUS INTERNATIONAL VISITORS | MLAA CONFERENCE

Lucas Eguiraun

Lucas started his career at ABUS, Spain almost 20 years ago. In 2012 he moved to Germany with his family, where he started his role as Area Sales Manager at the ABUS Pfaffenhain production site, where ABUS develops and produces the range of high security restricted locking systems. Since 2013, he has been supporting LSC in Australia and New Zealand, helping develop the market for high security keying platforms.

Christian Jerger

Christian became part of the ABUS family 2017. He has since worked as an Area Sales Manager for the APAC Region. His role includes finding new Partners and supporting the existing Partners. With LSC approaching our 25 year partnership with ABUS Christian plays an important role in growing the business for ABUS in Australia and New Zealand.

Fabian Mayer

After successfully graduating with a Master's degree in Sales Engineering and Product Management Fabian worked in the lighting industry on a number of exciting projects in the smart building sector and logistics industries. Fabian joined ABUS in 2021 as a Product Manager for digitalisation projects for their padlocks.

Sebastian Rothe

Before he started his career at ABUS in 2000, Sebastian spent 1 year abroad, including half a year in Australia. During this time he fell in love with this region and it was already his wish at that time to be able to work in or for this area one day. Sebastian has been with ABUS for over 22 years.

THE DUPLICATOR FOR THE NEXT GENERATION

Mechanical duplicating machines have been a mainstay of locksmith shops since the 1860's when Linus Yale invented the modern pin tumbler cylinder and associated keys.

Despite improvements in technology, the concept remained relatively unchanged – until now.

Silca revolutionises the standard duplicator by introducing laser reading and electronic carriage control. No longer a mechanical tracer point needs to run over the original key.

Springs, handles, cogs and levers give way to precise electronic control, stepping motors, lasers and LED lighting.

SD851467ZB

Features:

- Faster
- More accurate
- Safer and easier to use
- Longer lasting cutter
- Intuitive LED status indicator
- Single button start
- Compact footprint
- Most swarf is captured internally

Free yourself from the machine! Get it to do the work for you – effortlessly, accurately, safely.
