Yarrabilba State Secondary College: Smart Access Control for a Modern School

Yarrabilba State Secondary College is a progressive new school serving Logan City in southeast Queensland, Australia – a fast-growing corridor between Brisbane and the Gold Coast.

Since opening in 2020 with 250 students and 50 staff, the college has placed a strong emphasis on outdoor and project-based learning, with students frequently engaged in hands-on activities beyond the classroom.

01 The Challenge

At launch, the college relied on traditional locks and keys. But it quickly became apparent that this approach didn't suit the dynamic nature of the school day. Teachers were often required to move between multiple buildings, many carrying up to seven separate keys. This was not only inconvenient – especially while also managing laptops and learning materials – but also costly and cumbersome when keys were lost or staff moved on.

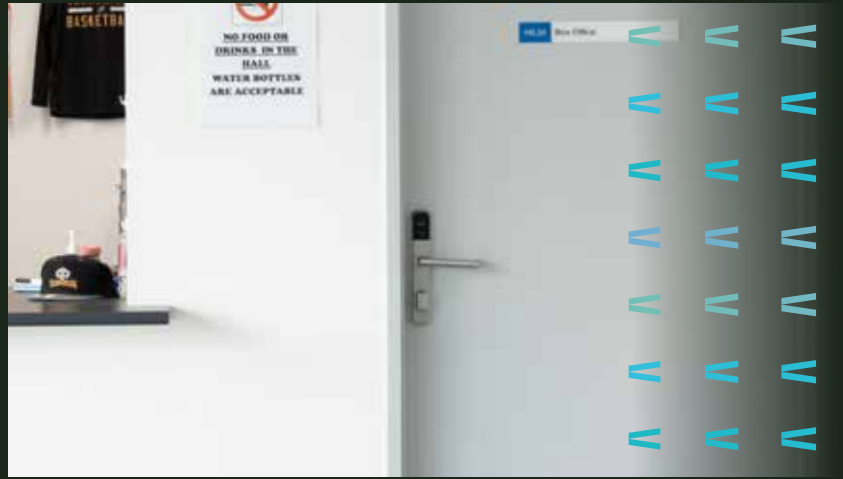

Security was another concern. With Yarrabilba offering state-of-the-art sports and arts facilities to the local community after hours, a way to grant controlled access to external users without compromising the safety of students and staff was essential.

02 The Solution

To address these challenges, Yarrabilba implemented a Salto Space smart access system. Using programmable keycards and wristband fobs, the system gives staff access to the areas they need based on their role, and external users access to specific facilities only at set times.

The flexibility of the Salto system means cards and fobs can be rapidly issued, modified or deactivated. If a credential is lost, it can be decommissioned instantly – no need to replace physical locks. Issuing a new fob is fast, inexpensive, and handled in-house.

Beyond access control, the same credentials are used for printing, scanning, and other shared services – reducing the need for staff to juggle multiple devices or IDs. Salto's audit trail feature also ensures school leadership can monitor who accessed which areas and when – a critical capability for managing both safety and transparency.

03 Key Benefits

Ease of Use

Teachers simply tap their wristband or card on the lock – especially handy when their hands are full.

Convenience

No more bulky sets of keys. Just one card or fob does it all.

Multi-Functionality

The same credential is used for door access, printing, and more.

Low Maintenance

Lost fobs are easily deactivated and replaced, with no locksmith callouts or rekeying.

Improved Security

Salto ensures only authorised users can access specific areas, with visibility into access events.

Support for Community Use

External groups can use the facilities securely after hours, without putting the rest of the school at risk.

Deputy Principal Janelle Whatmore sums it up

“Our staff love the Salto system, and from a management perspective, this system is really great and easy for us to use. We can control access, easily replace fobs when they’re lost, and can track and monitor who has accessed which areas.”

For more information, scan the QRs or visit saltosystems.com/en-au/industries/education-solution.

SMART, RELIABLE, ALWAYS CONNECTED

SECURAM

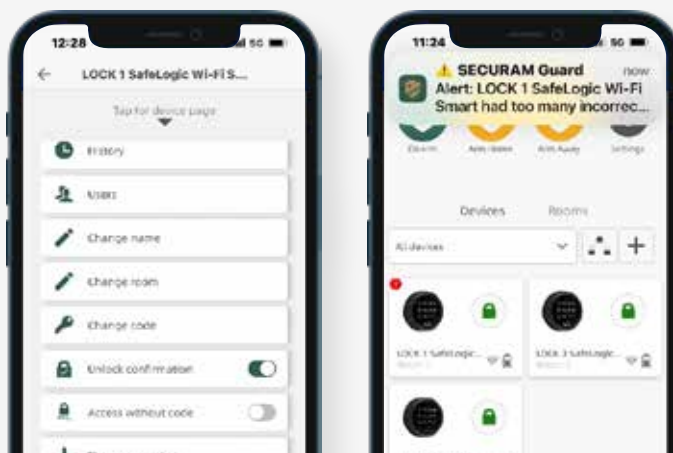

NEW

The new Wifi enabled SafeLogic keypad from Securam allows for the management of up to 10 user codes, remote access control and notification alerts via the Securam Guard App.

The keypad is compatible with the EL0601* swing bolt so is easily retrofitted and allows for an upgrade of an existing lock.

McGrath Smart Locks Training Success

On September 1st and 2nd, we conducted engaging training programs focused on McGrath Smart Locks. Led by Graeme McGrath and David Cooper, the sessions equipped participants with in-depth knowledge of installation, operation, and troubleshooting of these advanced smart door locks.

In addition to technical training, the program also highlighted the unique features and benefits of McGrath Locks, giving attendees a broader understanding of how

these solutions can add value across different applications. Through hands-on activities, interactive discussions, and expert guidance, participants developed the practical skills needed to confidently manage McGrath Locks.

The training also encouraged collaboration and experience sharing among participants, creating a dynamic learning environment. We thank everyone involved for their enthusiasm and commitment, which helped make this program a resounding success.

Featured Digital Smart Locks

McGrath Locks offer a trade grade range of innovative and stylish locking solutions, designed for both residential and light commercial use.

HAPPY CUSTOMERS

LOCK & KEY
WHAKATANE

Meet Les and Lee from Lock & Key in Whakatane, where great service and expert locksmithing have made the shop a trusted name in the community. Les and the team have built their business on years of knowledge and a genuine commitment to keeping people safe. Their shop has become a go-to for friendly advice, and practical solutions.

It's always great to see the people behind the counter who make these businesses thrive. Les and Lee were joined by their dog Bo, who clearly enjoys being part of the Lock & Key team too!

LOCKWISE
HASTINGS

Alex Van Hooijdonk of Lockwise Hastings, proudly standing with their brand-new Ultra-Secua display stand. A first of its kind in New Zealand, this innovative solution is designed to bring electronic locking to security screen doors — a major step forward in everyday home security. The display allows customers to see how the technology works up close, making it easier to understand the benefits and features.

Alex and the Lockwise team are excited to be leading the way with this new addition, giving Hawke's Bay residents access to the latest in security innovation. We look forward to seeing more McGrath Locks solutions showcased across the region, helping locksmiths bring innovative security options to their customers.

Safety Technology
International
